CM 12x Heard but not seen.

AUDIOFOCUS

CM 12x is a uniquely compact, passive 2-way coaxial stage monitor, with the flexibility to serve as a full-range PA speaker, making it a popular choice for live events, touring, DJ sets, drum fills, and front fills.

The horn orientation can be changed quickly by hand, with no tools needed. Created to deliver outstanding SPL for its size, CM 12x's low profile design won't get in the way of the performance.

The HF driver diaphragm assembly employs a high specification cotton composite dome together with a phasing plug, giving CM 12x its exceptional linearity, precision, and musicality.

We recommend AUDIOFOCUS and Powersoft amplifiers for use with CM 12x.

Housed in a rugged, road-ready enclosure with a rigid magnetic grill, CM 12x is built with pride in Belgium and coated in tough, weather-resistant polyurea to protect your investment.
