

118S

High performance next-gen sub
(Preliminary information)

118S is a compact, exceptionally powerful passive touring subwoofer, created as a core component of the AUDIOFOCUS ARRoCC constant curvature loudspeaker system.

The subwoofer houses a next-generation 18" neodymium LF transducer. Tetracoil Double Voice Coil technology allows 118S to achieve best-in-class SPL for its size while ensuring exceptional efficiency and clarity.

118S can be quickly deployed in cardioid and end-fire configurations when used with AUDIOFOCUS A Series amplifiers. Armonia presets are also available for Powersoft amplifiers. 118S can be used standalone or stacked and can be flown with CC210Wx and CC210Nx cabinets using the ARRoCC flying frame accessory.

All AUDIOFOCUS loudspeakers are built in Belgium by skilled craftspeople and state-of-the-art machinery before being coated in tough, weather-resistant polyurea to safeguard your investment.
