

118SGa Ground stack 18" self-powered subwoofer

118SGa is a compact, exceptionally powerful active touring subwoofer, created as a core component of the AUDIOFOCUS ARRoCC 210 constant curvature and ELIZ 210 line array loudspeaker system.

118SGa is designed for standalone and ground-stacked deployment, providing a clean appearance and avoiding the weight and cost of integrated rigging hardware.

The subwoofer houses a next-generation 18" neodymium LF transducer. Tetracoil Double Voice Coil technology allows 118SGa to achieve best-in-class SPL for its size while ensuring outstanding efficiency and clarity.

118SGa is equipped with an AUDIOFOCUS A4M SCiO Class-D amplifier module with comprehensive integrated DSP. The amplifier can be remotely monitored and controlled via a browser-based WebUI.

All AUDIOFOCUS loudspeakers are built in Belgium by skilled craftspeople and state-of-the-art machinery before being coated in tough, weather-resistant polyurea to safeguard your investment.

Complete solution

Omni and Cardioid

30Hz to 80Hz

Technical specifications
